

Chapter 4 Warm-Up

Section 4.1 Warm-Up

- Express 45 minutes as a fraction of an hour.
- Express your answer from #1 as a decimal.
- Richard works from 8:30 a.m. until 5:45 p.m. He takes a 1-hour lunch break. How many hours does he work? Express your answer as a decimal.

Section 4.2 Warm-Up

- If your regular hourly wage is \$11.85, how much would your overtime wage be if you are paid time-and-a-half?
- Calculate.
 $10 \times 38 + 10 \times 40 + 10 \times 35$

Section 4.3 Warm-Up

- What is 8% of 20 000?
- Calculate: $(5\% \text{ of } 5000) + 400$.

4.

S	M	T	W	T	F	S
24	25	26	27	28	29	1
2	3	4	5	6	7	8
9	10	11	12	13	14	15
16	17	18	19	20	21	22
23	24	25	26	27	28	29
30	31	1	2	3	4	5

Frances is paid every other Friday. How many times will she be paid this month?

- What is 20% of 200?
- What is 1.75% of 400?

- Jeff's gross pay is \$565. \$53.99 is deducted from his paycheque. What is his net pay?
- If you worked 40 hours and earned \$23.95/h, what was your gross pay?
