Name: $\qquad$

## Unit 3 - Finance

## 3.7 - Change in Earnings

- During your working life, the amount you earn is likely to change occasionally.
- You may earn more because you receive a raise or get a new job with a higher rate of pay.
- Your wages may drop if your employer has to reduce his or her expenses or if you choose to work part-time.

## Examples

1. A plumber was earning $\$ 720.00$ per week. Last week, she received a $12 \%$ raise.
a. What is the dollar value of the raise?
b. What is her new weekly wage?
c. How can we calculate her new wage using only one calculation?
2. A waiter earns $\$ 8.35$ per hour. The boss gives the waiter a raise of $\$ 0.60$ an hour. What is the percent increase of the raise?
3. Bill was working at a warehouse making $\$ 10.25$ per hour. His boss decided to increase his hourly rate to $\$ 10.75$ an hour.
a. What is the dollar value of the raise?
b. What is the percent increase of the raise?
4. John's starting wage is $\$ 12.50$ per hour and his employer promises him a $2 \%$ increase every month if he works well. What is John's wage after 6 months?

## Assignment - Show your work on a separate sheet of paper!

1. Complete the following table.

| Present Wage | Percent Rate of Increase | Dollar Amount of Increase | New Wage |
| :---: | :---: | :---: | :---: |
| $\$ 7.65$ an hour | $2 \%$ |  |  |
| $\$ 310.00$ a week | $11 \%$ |  |  |
| $\$ 1087.25$ a month | $3.5 \%$ |  |  |
| $\$ 14.95$ an hour | $1.5 \%$ |  |  |
| $\$ 20800.00$ a year |  |  | $\$ 572.00$ |
| $\$ 15000.00$ annually |  |  | $\$ 17$ |

2. Suppose that you are paid $\$ 13.35$ an hour. After 3 months, you receive a raise of $2 \%$. What is your new hourly rate?
3. Last year a secretary earned $\$ 21,900.00$. She improved her qualifications by taking two courses and her employer increased her salary by $4.6 \%$. What is her new salary?
4. A fast food outlet gave its employees a $3.25 \%$ raise. The average rate before the raise was $\$ 8.65$ an hour. Find the new average hourly rate of pay.
5. James Martin's annual salary at his first job after graduation is $\$ 13,104$. After one year, his employer gave him a $4 \frac{1}{2} \%$ increase in his salary. Calculate his new salary.
6. A wholesaler employed William Green as a salesman, agreeing to pay him $\$ 1200.00$ a month and to increase his salary by $4 \%$ every six months. How much will William's monthly salary be at the end of one year?
7. Complete the following table.

| Present Salary | Dollar Amount of Increase | Percent Rate of Increase |
| :---: | :---: | :---: |
| $\$ 6.00$ an hour | $\$ 0.30$ |  |
| $\$ 6.75$ an hour | $\$ 0.52$ |  |
| $\$ 280.00$ a week | $\$ 19.80$ |  |
| $\$ 320.00$ a week | $\$ 40.00$ |  |
| $\$ 1700.00$ a month | $\$ 350.00$ |  |
| $\$ 2100.00$ a month |  | $2.4 \%$ |
| $\$ 13480.00$ a year |  |  |
| $\$ 28800.00$ a year |  | $4.4 \%$ |

8. A construction worker was earning $\$ 17.05$ an hour. The company decided to raise her salary by $\$ 1.00$ an hour. What was her percent rate of increase?
9. A camp counsellor earned a weekly salary of $\$ 250.00$. He received a raise and his salary increased to $\$ 275.00$ a week. What was his percent rate of increase?
10. Jean-Luc Thibodeau earns $\$ 800,000$ a year as a hockey player. Next year his salary will be $\$ 950000$. Calculate the percent rate of increase.
