

FPC-10

4.1 – Representing Relations

The RELATION between FRUITS and COLOURS is given in the **TABLE**:

Definition of **RELATION**:

Fruit	Colour
apple	red
apple	green
blueberry	blue
cherry	red
huckleberry	blue

Describe the relation in **WORDS**:

Represent the relation as a set of **ORDERED PAIRS**:

Represent the relation as an **ARROW DIAGRAM**:

Animals can be associated with the classes they are in.

Describe this relation in word.

Represent this relation as a set of Ordered Pairs:

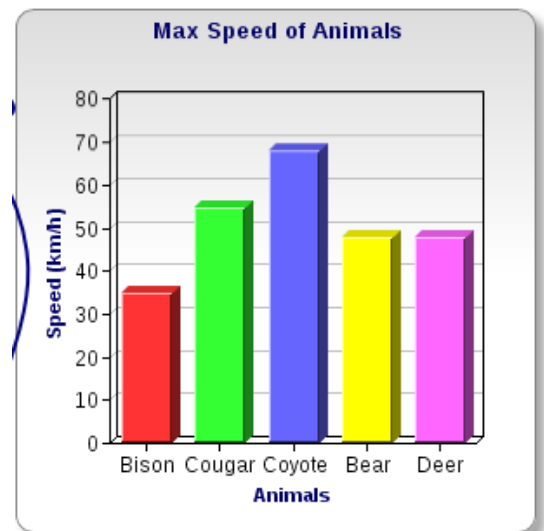

Animal	Class
ant	Insecta
eagle	Aves
snake	Reptilia
turtle	Reptilia
whale	Mammalia

Represent this relation as a Arrow Diagram:

Consider the Relation shown as a Bar Graph:

Show this relation as a Table and Arrow Diagram.

When can a Relation be represented as a Bar Graph?

Consider the Relation represented by the Bar Graph:
Represent the Relation as a Table and Arrow Diagram.
