## Math 9

Name: $\qquad$

## 4.3 - Linear Relations II

Date: $\qquad$

## Warm Up

1. a) Determine if each of the TOVs given below represents a LINEAR or NON-LINEAR relation.
A.

| $x$ | $y$ |
| :---: | :---: |
| -2 | -1 |
| -1 | 2 |
| 0 | 5 |
| 1 | 8 |

B.

| time | Temp |
| :---: | :---: |
| 0 | 9 |
| 1 | 7 |
| 2 | 5 |
| 4 | 3 |
| 5 | 1 |

C.

| time | $h t$. |
| :---: | :---: |
| 0 | 0 |
| 1 | 2 |
| 2 | 4 |
| 3 | 7 |

D.

| time | $V$ |
| :---: | :---: |
| 0 | 10 |
| 2 | 4 |
| 4 | -2 |
| 6 | -8 |

b) Explain how to determine if a TOV represents a Linear or Non-Linear relation.
2. a) Sketch the graphs of each of the relations $A$ to $D$.

b) Explain how to determine if a graph is a Linear or Non-Linear relation.
c) Determine the equations that model relations $A$ and $D$.

## How to Find the Equation of the Graph of a Linear Relation.

Given below are the graphs, TOVs, and equations of relations $A$ and $D$ that we looked at earlier.

| time | $V$ |
| :---: | :---: |
| 0 | 10 |
| 2 | 4 |
| 4 | -2 |
| 6 | -8 |

Notice that the equation of a Linear Relation is written in the form: $\qquad$
How can we obtain the values for the coefficient of $x$ and the constant from:
TOV:

Graph:

Determine the equations of the following Linear Relations. Write the equation in the form: $y=m x+b$

## Sketch the graphs for the following Linear Equations:

$y=2 x+3$

$$
y+x=-1
$$

$2 x+y+2=0$
