## Unit 4 – Geometry

### 4.5B – Similar Triangles

The inside angles of a triangle always add up to  $180^\circ$ .

Find the measures of the missing angles:

Two triangles are similar if:

The corresponding angles are equal **AND** The ratios of the corresponding side lengths are equal

**Are the following triangles similar?**

1.

2.

$\triangle CBA \sim$  \_\_\_\_\_

3.

4. If the following triangles are similar, find the lengths of the missing sides.

5. If the following triangles are similar, find the lengths of the missing sides.

## Assignment

1. Are the triangles similar? If they are similar, find the lengths of the missing sides.

2. The following triangles are similar. Find the value of  $x$ .

3. Are the following pairs of shapes similar or not?

4. Given that the following triangles are similar, find the length of side  $x$ .
